

Quick Train

How to set up personal email

The Treo™ 650 smartphone from Cingular has three applications for sending and receiving email:

for Internet mail services
such as **AOL**, **EarthLink**, or **Yahoo! Mail Plus**

VersaMail

Xpress Mail

for secure enterprise mail
or personal Internet mail

Web

for free web-based mail
such as **HotMail** or **Yahoo!**

This guide teaches how to configure VersaMail™. For Xpress Mail and web-based mail, please see the other side.

How to configure VersaMail using the built-in settings

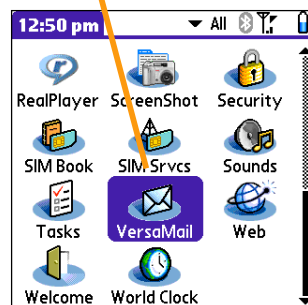

VersaMail makes it simple to use three of the most popular mail services: **Bell South**, **EarthLink**, and **SBC**.*

Just select the name of your service, enter your username and password, and the Treo 650 smartphone takes care of the rest.

This example shows how to set up an **Earthlink** account and call it "My Mail".

* These services may require additional fees

- 1** Open the
VersaMail application

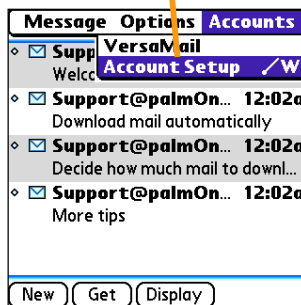

If you cannot see the
VersaMail icon, press
the **Home** button

until you see **All** at
the top of the screen.

Then try again.

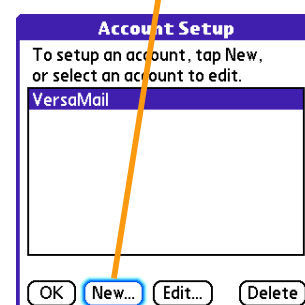

- 2** Select **Account Setup**
from the Accounts menu

To display the menu
system, press the
Menu button

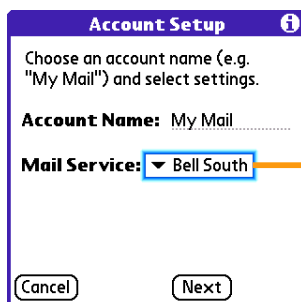

- 3** Select the **New...** button
to create a new account

- 4** Enter an **Account Name**
(such as "My Mail" or "Work")

- 5** Select your **Mail Service**
from the drop-down menu

- 6** Select the **Next** button
at the bottom of the screen

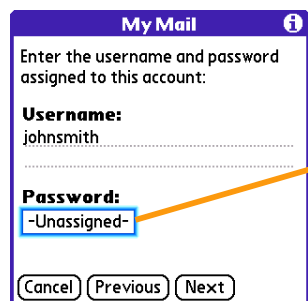

Other
Exchange ActiveSync
Bell South
EarthLink
SBC

To set up Exchange ActiveSync,
please see page 73 in the
Treo 650 User Guide

- 7** Enter your **username**
(for example, johnsmith)

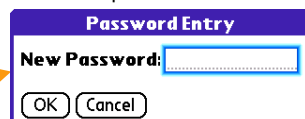

- 8** Set your **password**

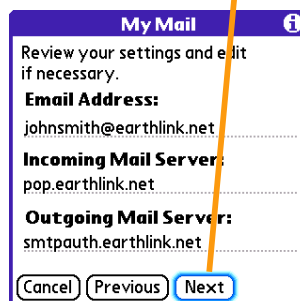

- 9** Select the **Next** button
at the bottom of the screen

Enter new password...

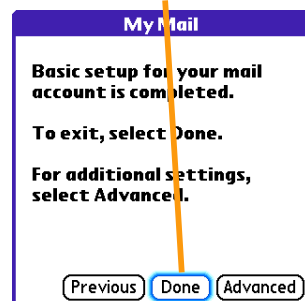

... then select the **OK** button

- 10** Check your email address
then select the **Next** button

- 11** Select **Done** to start
using your email

How to configure VersaMail for any email service

You can manually enter the settings for any email service* into the Account Setup wizard.

This example shows how to set up an AOL account.

* These services may require additional fees

1 Perform steps 1 - 3 from **How to configure VersaMail using the built-in settings** on the other side.

2 Enter a short **Account Name** and set **Mail Service** to Other

3 Select the **Protocol** that your mail service uses from the drop-down menu

4 Select the **Next** button at the bottom of the screen

AOL and CompuServe use IMAP
Most other services use POP

5 Enter your **username** and **password** then select the **Next** button

6 Add the proper @ ending to your email address (for example, johnsmith@aol.com)

7 Enter the name of your **Incoming Mail Server** from the table at the right

Mail Service	Incoming Mail Server	Protocol
AOL	imap.aol.com	IMAP
Apple .Mac	mail.mac.com	POP or IMAP
Cablevision	mail.optionline.net	POP
Charter	pop.charter.net	POP
Comcast	mail.comcast.net	POP
CompuServe	imap.cs.com	IMAP
Gmail	pop.gmail.com	POP with SSL
Mail.com	pop.mail.com	POP
NetZero	pop.netzero.com	POP
Speakeasy	mail.speakeasy.net	POP
Verizon DSL	incoming.verizon.net	POP
Yahoo! Mail Plus	pop.mail.yahoo.com	POP

If your Mail Service is not listed here, please see their web site

8 Enter **cwmx.com** as the **Outgoing Mail Server**

9 Check all your settings then select the **Next** button

10 Select **Done** to start using your email

A few services require additional settings. For example, **Google Gmail** requires authentication.

Select the **Advanced** button to make additional settings such as Port Number, SSL security, APOP or ESMTP authentication.

If your mail is not working properly, contact your **Mail Service** provider: AOL, Apple, CompuServe, Google, Yahoo!, etcetera...

How to set up Xpress Mail for personal mail

Either see pages 74-76 in the Treo 650 User Guide, or

1. Launch **Internet Explorer for Windows**
2. Open the **Cingular** website
support.cingular.com/simulator/cingular/treo650/
3. Click the topic
How do I configure Xpress Mail to collect my personal email?

How to set up web-based mail

1. Launch the **Web** application on the Treo 650 smartphone
2. Select the **Wide Page Mode** command from the Options menu
3. Login to the mobile web portal for your mail service:
 - **HotMail** mobile.msn.com/hm/folder.aspx
 - **Yahoo!** mobile.yahoo.com

Tip: Set a bookmark, or create a Favorite button in the Phone application
